1. Introduction

1.1 Purpose

This document contains instructions for installing the Microsoft .NET Framework 4. This is a software requirement for PARTS (Paragon Automated Resource Typing System) and should be installed prior to setup.

2. Minimum System Requirements

2.1 Supported Operating Systems

- Windows XP SP3
- Windows Server 2003 SP2
- Windows Vista SP1
- Windows Server 2008
- Windows Server 2008 R2
- Windows 7

2.2 Hardware Requirements

- Minimum disk space (2 GB)

3. Installation

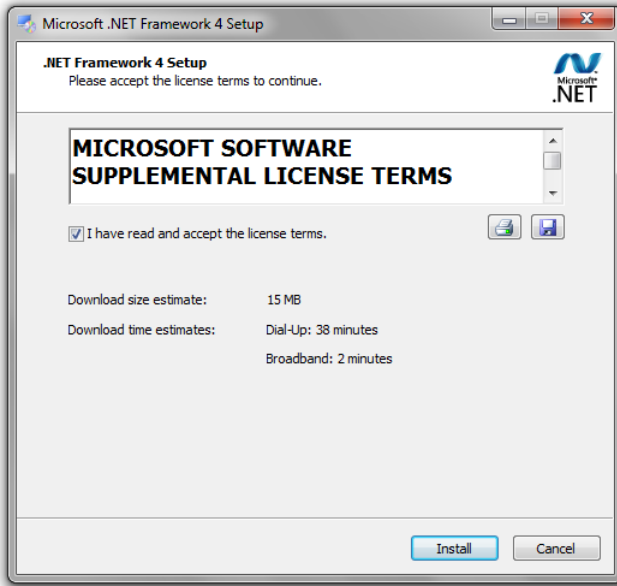

3.1 Download Microsoft .NET Framework 4

Download the latest [Microsoft .NET Framework 4](#) installation executable **dotNetFx40_Full_setup.exe** from Microsoft and save to your local disk drive.

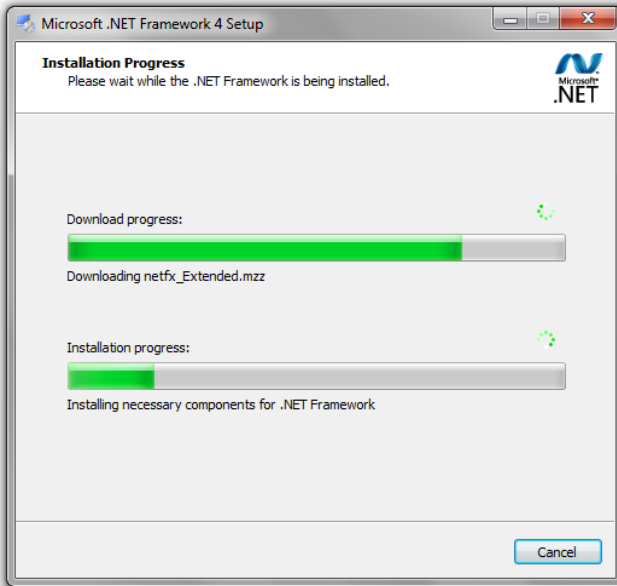

3.2 Install Microsoft .NET Framework 4

1. Locate the downloaded Microsoft .NET Framework 4 installation executable **dotNetFx40_Full_setup.exe** and double click to run.
2. (License Terms) Accept license terms.

3. (Installation Progress) Follow the prompts and let the installation process run.

4. (Installation Complete) Click the **Finish** button to complete installation.
